

Name: Christopher B.
Project: Walking Trail Junction Markers
Beneficiary: Sharon Woods Metro Parks
Date: June 7, 2008

Project Description: The assembly and installation of trail marker posts in Sharon Woods Metro Park. Trail marker posts were erected at trailheads, junctions and other locations along two nature trails: the Spring Creek Trail and the Edward S. Thomas Trail. Previously many junctions on the trail were unmarked and the hiker needed printed maps, which they often did not have. The beneficiaries of the project will be all those who use the nature trails. Sharon Woods, being in a major metropolitan area, has many recreational trail users who will be guided by the trail marker posts.
