

Name: Michael B.

Project: Fishing Line Collection Containers

Beneficiary: Hoover Reservoir, Columbus Division of Power, Water & Watershed Management

Date: July 18, 2009

**Project Description:** Construction and installation of fishing line collection containers around Hoover Reservoir. Fishing line collection bins were installed at 12 of the most popular fishing locations. Fishing line that is properly disposed of in these collection bins will not be left in fishing areas of the lake to entangle wildlife or to entangle and damage boat propellers. The beneficiaries of the project will be the wildlife and all those who use Hoover Reservoir for recreation.
